OCCUPATIONAL STANDARD

(For use in the development of supply chain related job descriptions, performance evaluations, career development plans, etc.)

Position:	LOGISTICS MANAGER
Description of Position (As defined by the CSCSC Stakeholder Community)	<i>Logistics Managers plan, organize, direct, manage, evaluate, and are responsible for the operations and budget of departments or companies involved in supply chain services including customer service, warehousing, inventory control, transportation, materials handling, and strategic planning. This position includes the identification of opportunities for logistics operation improvements.</i>
Position Development	Advancement to senior management positions is possible through progressively responsible positions and extensive management experience. The career path will be impacted by the size, type, geographic scope, culture, and organizational structure of the firm offering employment.
Required Qualifications:	(Education, Training, Related Work Experience)
Education	Logistics Managers require completion of a college or university program in business administration, transportation administration, or engineering, or an equivalent combination of training and supply chain experience. A Graduate school background and international experience are considered assets.
Training	Logistics Managers may require some on-the-job training; however, most employers require that the individual will already have the mandatory skills, knowledge, work-related experience, and/or training.
Related Work Experience	Several years of progressively responsible experience in logistics are usually required, including supervisory experience. Extensive experience as a supervisor may substitute for formal education.
Tasks:	

*Note the OS addresses alternative position titles including Dispatch Manager, Freight Forwarding Manager, Dispatch Manager, Shipping Manager, Inventory Control Manager, Stock Control Manager, Receiving Manager, Supply Control Manager, etc.

Logistics Managers may perform some or all of the following general tasks:

- Plan, develop, organize, direct, manage and evaluate the operations and budget of a logistics department or a logistics services company
- Address activities in customer service, warehousing, inventory, transportation, materials handling, and strategic planning
- Develop the logistics strategy for the organization
- Develop and monitor the planning, organizing and execution of logistics support activities such as maintenance planning, repair analysis, and test equipment recommendations
- Set policies and standards, including determination of health and safety procedures for the handling of dangerous goods, and ensure compliance with transport regulations
- Direct and manage corporate governance and regulatory compliance
- Identify and manage risk within the logistics activities
- Stay informed of logistics technology advances, and apply the appropriate technology in order to improve logistics processes
- Establish key performance indicators, monitor ongoing performance, and improve performance against set goals
- Develop and implement profit improvement plans and change management plans
- Resolve work-related problems and prepare and submit progress and other reports
- Communicate and represent the organization to existing customers, potential customers, the public, government, and other external sources in the industry
- Lead the development of pricing strategies and negotiations of price and service levels with customers
- Understand customers' needs, service those needs, and maintain and develop positive business relationships with a customer's key personnel involved in or directly relevant to logistics activities
- Direct the hiring, training, and performance evaluations of staff
- Direct, coordinate, assign, monitor and review the work of individuals engaged in the following duties: shipping, receiving, storing, distributing materials, parts and products, dispatching crews, scheduling transportation crews and routes, and other related activities
- Manage contractor and subcontractor activities, reviewing proposals, developing performance specifications, and serving as a liaison with the organizations
- Collaborate with staff, other departments, senior management, and decision makers to share information, problem solve, and to clarify

***Note the OS addresses alternative position titles including Dispatch Manager, Freight Forwarding Manager, Dispatch Manager, Shipping Manager, Inventory Control Manager, Stock Control Manager, Receiving Manager, Supply Control Manager, etc.**

	upgraded by attending conferences and networking functions, by liaising with industry associations, and by taking management classes through educational institutions.
Additional Information	(Physical Aspects, Attitudes)
Physical Aspects	A Logistics Manager works extensively in an office environment (sitting for long periods, repetitive computer and telephone use). Typically there is no heavy lifting, bending, or stooping required.
Attitudes	A Logistics Manager should have very advanced interpersonal skills – be persuasive, empathetic, able to handle pressure, creative, have a sense of urgency, and attention to detail. A Logistics Manager must exhibit leadership, people management skills, advanced negotiation skills, advanced conflict resolution skills, and organizational and planning abilities. Flexibility is important, as a Logistics Manager works with diverse groups, individuals and interests.
Future Trends Affecting Essential Skills:	Logistics Managers are in demand and will continue to increase in demand in the North American marketplace. Increasing computerization may mean that Logistics Managers will require enhanced computer skills in order to work with more complex software. Knowledge of international trade law, and new and emerging financial instruments and tools is and will continue to be essential in a growing global economy. The ability to speak more than one language, and an awareness of and sensitivity to the diversity of international cultures is considered a growing need in the face of increasing globalization. Furthermore, an understanding of the principles of sustainability as they relate to environmental, social, and corporate governance issues is of increasing importance.

Government of Canada Defined - Related NOC Code & Description	<p>0731 - Managers in transportation</p> <p>Managers in transportation operations plan, organize, direct, control and evaluate the operations of transportation companies such as railways, airlines, bus lines, municipal transit systems, shipping lines and trucking companies, under the direction of a general manager or other senior manager. Managers in transportation freight traffic plan, organize, direct, control and evaluate companies or departments responsible for the transportation and movement of goods, under the direction of a general manager or other senior manager. They are employed by transportation, freight forwarding and shipping companies and by transportation departments of companies in retail and manufacturing sectors and utilities.</p>
